SUMMARY

I am a passionate Cyber Security Researcher and Pentester dedicated to securing the digital landscape. With expertise in Web Application Security, API Security Testing, and Mobile Application Security, I specialize in identifying critical vulnerabilities before they can be exploited.

EDUCATION

Higher Secondary Certificate (HSC)

2021-2022
Dhaka Govt College, Dhaka, Bangladesh
Group: Artch
GPA: 4.00 out of 5.00

SKILLS

- Technical Reporting: Ability to document complex vulnerabilities with clear Proof-of-Concept (PoC) and remediation steps.
- Analytical Thinking: Strong problem-solving skills focused on tracing attack vectors and root cause analysis.
- Responsible Disclosure: Committed to ethical hacking standards and legal compliance in security research.

CERTIFICATIONS(VERIFID)

Byte Capsule IT

- Ethical Hacking For Professionals(EHP)
- Jr. Penetration Tester Internship Certification

WITH OUT CERTIFICATIONS

TCM (cours)

- practical bug-bounty
- advanced web hacking
- Practical Api Hacking
- Mobile Application Penetration Testing

hacker sera (cours)

- bug-bounty
- Offensive Api Exploitation

Enciphers (cours)

- Android Application Security

Ec-Council (cours)

- Dark Web Forensics

Byte Capsule IT (cours - Running...)

- Digital Forensics & Cyber Crime Investigation

PROFESSIONAL EXPERIENCE

Jr. Pentester

Byte Capsule IT | 2026 - Present

- Collaborating with the security team to perform internal/external penetration tests on client infrastructures.
- Assisting in identifying, validating, and documenting security weaknesses across web apps and network services.
- Participating in the full security assessment lifecycle, from initial reconnaissance to final remediation support.

BUG HUNTING

Hackerone, Bugcrowd, cross-platform | 2026 - present

- Active Security Researcher: Proactively identifying critical vulnerabilities on global platforms like HackerOne and Bugcrowd.
- Responsible Disclosure: Delivering high-quality technical reports with Proof-of-Concept (PoC) and remediation strategies.
- Hall of Fame Achiever: Multiple Hall of Fame (HoF) recognitions for securing cross-platform environments.

Digital Forensics & Cyber Crime Investigation

Byte Capsule IT | 2026-present

- Incident Response: Identifying and neutralizing active cyber threats.
- Evidence Collection: Forensic preservation of digital evidence and logs.
- Threat Tracing: Analyzing attack vectors to identify the root cause of breaches.
- Data Recovery: Extracting hidden or deleted data for investigative purposes.
- Malware Analysis: Investigating malicious artifacts to understand threat behavior.
